

Plastic (PET) Strap

Market leading plastic strap solutions for every industry and application.

FROMM extrude both smooth and embossed Plastic (PET) strapping from 9mm to 32mm widths and various densities to suit a wide variety of strapping equipment.

FROMM is a global manufacturer of Polyester (PET) strap with three plants around the world. FROMM strap manufacturing plants all use modern extrusion methods and our global Manufacturing Manager ensures that each plant maintains the same exacting standards and methods.

To meet specific customer requirements we can custom engineer the strapping properties, including elongation and retained tension, which is critical in industries such as food & beverage, paper and baling. Short run customised strapping with different colours and the ability to print on the strapping for clear product identification is also available.

FROMM
ADVANTAGE

★ Features

- High impact resistance
- Elastic memory
- Corrosion resistant
- Stronger than steel strapping
- Hand and machine grades
- Smooth or embossed surface

+ Benefits

- High cost saving compared to steel
- Safe handling - reduces risk of employee injury
- Easy to use
- Can pull high tension
- Approved in all industries
- Compatible with most brands of machine and tools

Heavy Duty
Strapping Uses

Printed & Coloured
Options

Use with FROMM
tools & machines

★ Technical Specifications

Product Code	Strap Dimensions	Surface	Breaking Strain
4960.30ECO-S	9mm x 0.60 x 3000m	Green Special Embossed	2100 N
